Retail Sales Performance Analysis (2023 - 2025)

Interactive Dashboard Using Power BI

Name- Adeyemi Isaac

Tools – MS Excel, Power BI

Project Overview

This project analyzes retail sales data from 2023 – 2025 to evaluate business performance across region, products and time periods.

Objective:

- Understand overall sales performance
- Identify top performing products
- Analyze regional sales distribution
- Monitor sales against business targets

Data Preparation

Data Preparation included:

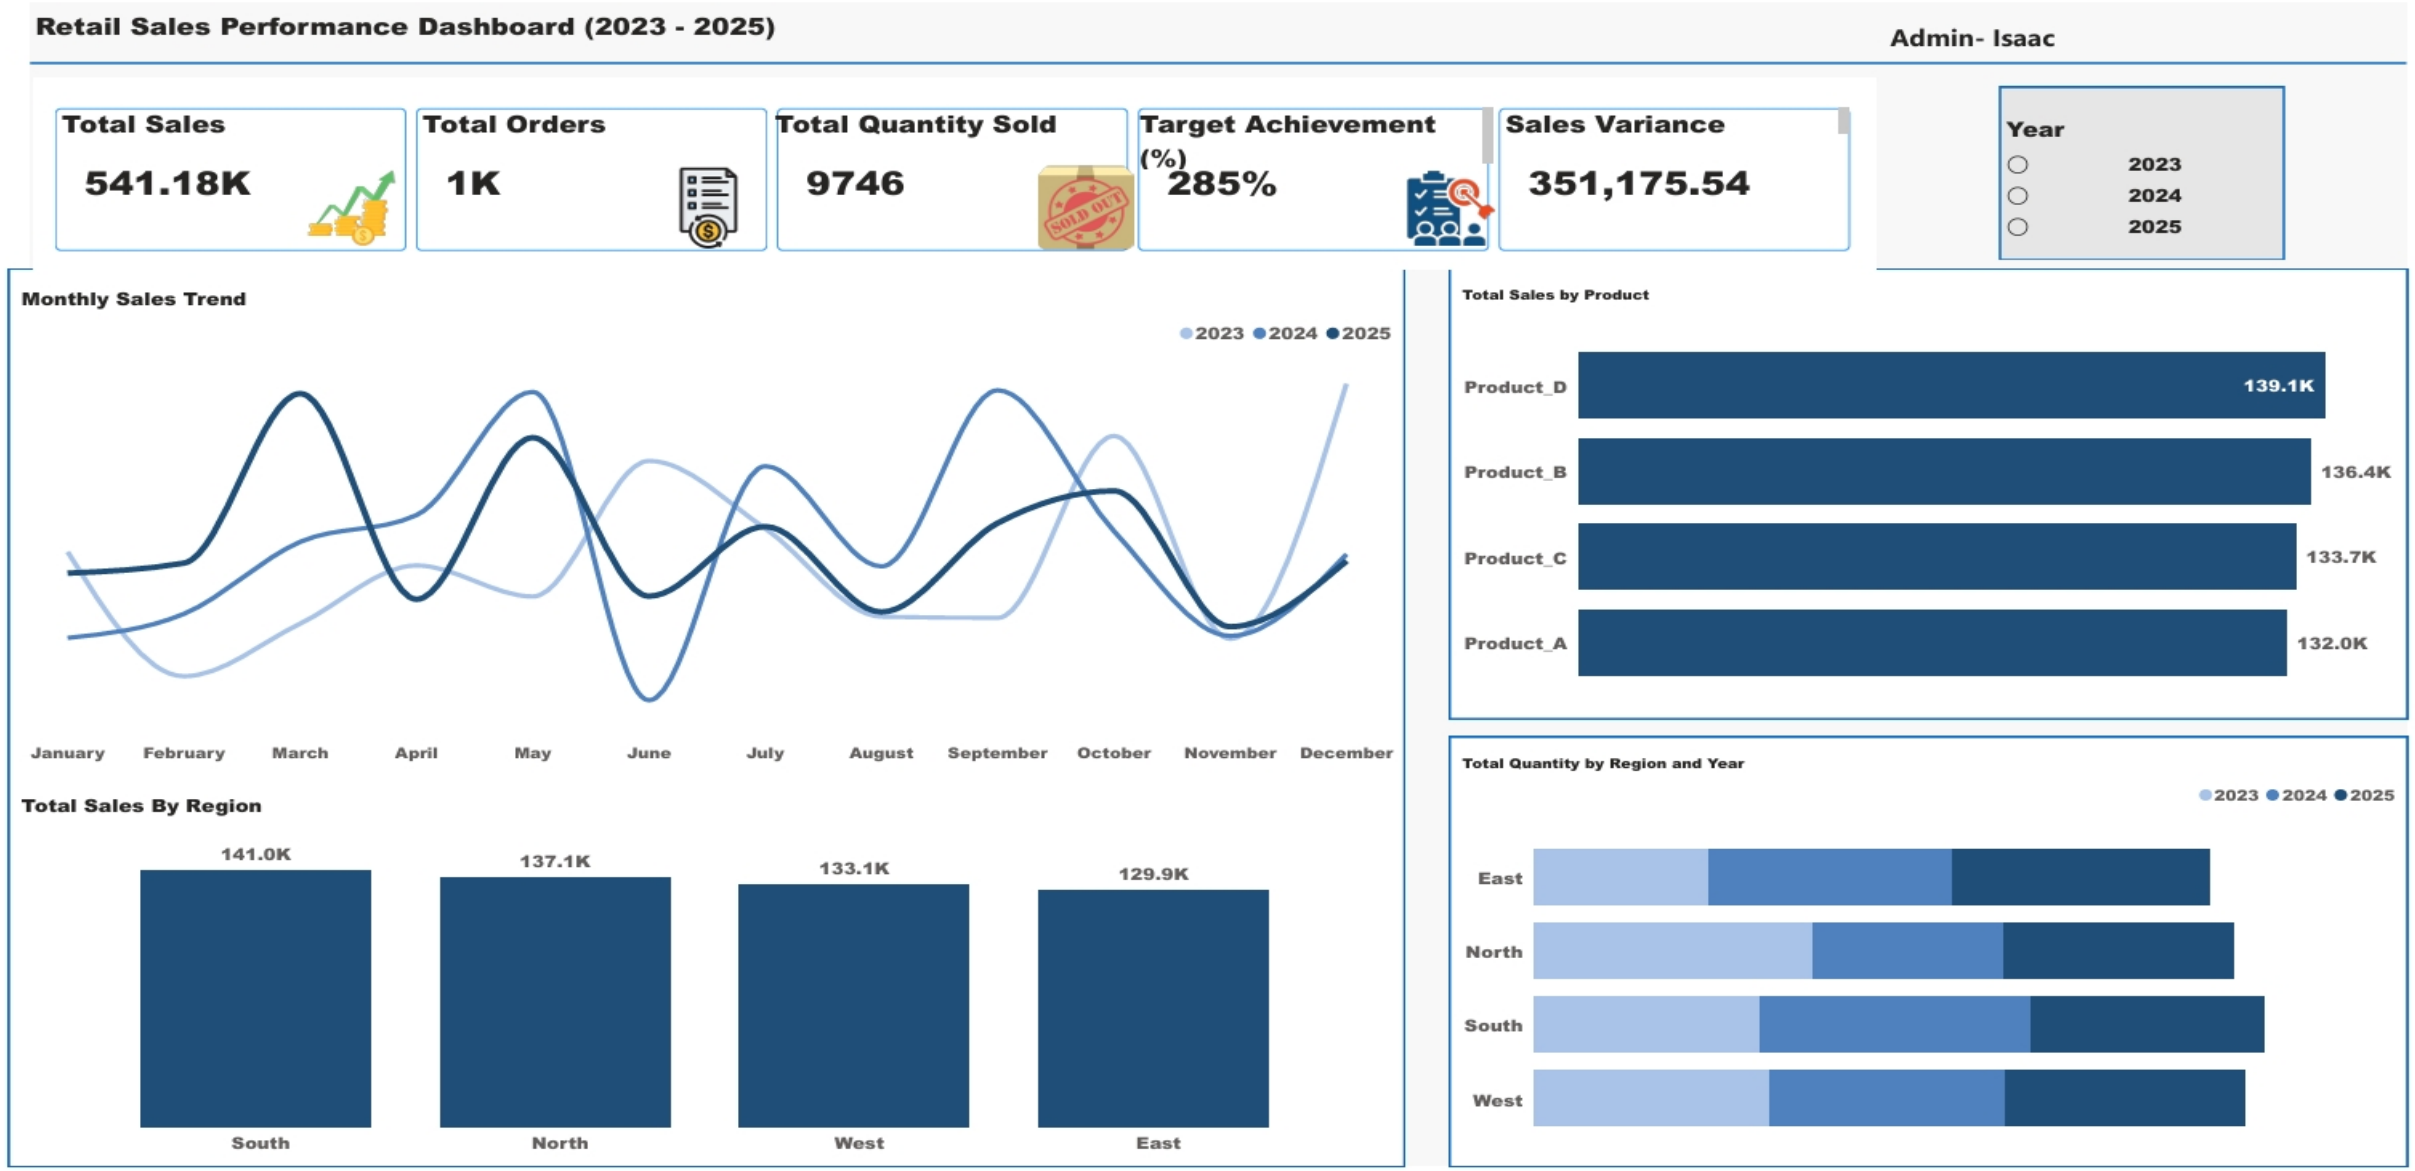
- Cleaning and validating the dataset
- Removing duplicate records using Order ID
- Creating calculated columns (Month, Year, Total sales)
- Developing KPI measures for performance analysis

Tools used:

Excel for data cleaning

Power BI for data visualization

Dashboard Overview



Key insights

Overall Performance:

- Total sales hit **541.18k** across 3 years with 1000 orders and 9746 units sold
- Target Achievement is an outstanding 284.83%.
- Sales Variance is 351,175.54.

Regional Performance:

- **South** leads all regions at 141.0k followed closely by North (137.1k), West (133.1k) and East (129.9k).
- No region is significantly underperforming.

Key insights

Product Performance:

- **Product D** is the top performer at 139.1k edging out Product B (136.4k), Product C (133.7k) and Product A (132k).
- All 4 products are remarkably balanced.

Quantity Performance:

- Quantites sold more in 2025 with 3326 sales compared to 2024 and 2023 sales which are 3255 and 3165 respectively.

Key insights

Monthly Sales Trend:

- **March and May** are strong peak periods across the 3 years, followed by September.
- In **December 2023,** there was a high amount of sales, but there was a wide decline in 2024 and 2025.
- **April, June and November** tends to dip over the years

Recommendations

- Focus marketing efforts on top performing products and amplify more for other products to maximize revenue.
- A proper check on underperforming regions to identify sales improvement opportunities.
- Look into periods where dips happen the most for sales generated
